QUALITY ASSURANCE

GENERAL

26. (1) In this Part,

“Committee” means the Quality Assurance Committee;

“deficient clinical ability” means, in relation to a member, that the member’s level of medical knowledge, skill or judgment makes his or her clinical performance unsatisfactory.

(2) The fact that a member uses or recommends a non-traditional treatment is not, by itself, determinative of deficient clinical ability.

27. The Committee shall administer the quality assurance program, which shall include the following components:

1. Peer assessment.
2. Physician review and enhancement.

3. Remediation of behaviour and remarks of a sexual nature by a member towards a patient that are not of a clinical nature appropriate to the service provided.

PEER ASSESSMENT

28. (1) The Committee may require a member to undergo a peer assessment by an assessor appointed under section 81 of the Health Professions Procedural Code.

(2) The assessor shall give the Committee and the member who was assessed a written report of the assessment.

(3) After considering the report, the Committee may decide,

- (a) to give the member an opportunity to correct the deficient clinical ability identified by the Committee;
- (b) subject to subsection 29 (1), to require the member to participate in a physician review program; or
- (c) that no further action is required.

(4) After the member has had an opportunity to correct the deficient clinical ability identified by the Committee, the Committee may require the member to undergo a peer reassessment by an assessor appointed under section 81 of the Health Professions Procedural Code.

(5) Subsections (2), (3) and (4) apply to a peer reassessment.

PHYSICIAN REVIEW

29. (1) Subject to section 33, the Committee may require a member to participate in a physician review program if the Committee is of the opinion, based on the report of a peer assessment or reassessment undergone by the member or any other written information, that the member may have deficient clinical ability.

(2) The purpose of a physician review program is to evaluate the member’s medical knowledge, skill, judgment and clinical performance and, where appropriate, the member’s medical knowledge, skill, judgment and clinical performance in a specialty of the profession.

(3) The program shall be designed to reflect the member’s type of practice and may include, but is not limited to,

- (a) requiring the member to answer, orally or in writing, questions that relate to the member’s type of practice;
- (b) reviewing certain patient charts from the member’s practice; and
- (c) requiring the member to examine simulated patients with simulated problems that relate to the member’s type of practice.

(4) The program shall be carried out by the person or body designated by the Committee.

(5) When the member has completed the physician review program, the person or body designated under subsection (4) shall give the Committee and the member a written report of the evaluation.

(6) After considering the report, the Committee may decide,

- (a) to give the member an opportunity to correct the deficient clinical ability identified by the Committee;
- (b) subject to subsection 30 (1), to require the member to participate in a physician enhancement program;

(c) subject to clause 31 (1) (a), to direct the Registrar to impose terms, conditions or limitations on the member's certificate of registration; or

(7) After the member has had an opportunity to correct the deficient clinical ability identified by the Committee, has completed, or has had an opportunity to complete, a physician enhancement program or has had terms, conditions or limitations imposed on his or her certificate of registration, the Committee may, subject to section 33, require the member to undergo a re-evaluation in a physician review program.

(8) Subsections (2) to (7) apply to a re-evaluation in a physician review program.

PHYSICIAN ENHANCEMENT

30. (1) Subject to section 33, the Committee may require a member to participate in a physician enhancement program if,

- (a) the member has undergone an evaluation or a re-evaluation in a physician review program;
- (b) the evaluation or re-evaluation has demonstrated deficient clinical ability on the part of the member; and
- (c) the Committee is of the opinion that the deficient clinical ability may be remediable.

(2) The physician enhancement program shall be an educational program designed specifically to reduce or eliminate the member's deficient clinical ability.

(3) A physician enhancement program may include a re-evaluation in a physician review program.

TERMS, CONDITIONS OR LIMITATIONS ON CERTIFICATE OF REGISTRATION

31. (1) Subject to section 33, the Committee may direct the Registrar to impose terms, conditions or limitations on a member's certificate of registration, for a specified period not exceeding six months, if,

 - (ii) is likely to expose the member's patients to harm or injury;
- (b) the member has failed to participate in a physician enhancement program as required by the Committee; or
- (c) the member has not successfully completed a physician enhancement program as required by the Committee, as demonstrated by a re-evaluation of the member in a physician review program.

Committee shall not direct the imposition of terms, conditions or limitations on the member's certificate of registration for any further specified period under any clause of subsection (1).

(3) If the Committee directs a second imposition of terms, conditions or limitations on a member's certificate of registration under subsection (2), the Committee shall inform the Executive Committee of the member's name and the fact of the second imposition and shall give the Executive Committee all of the information the Committee has relating to the second imposition the disclosure of which is not prohibited by section 83 of the Health Professions Procedural Code.

- (a) notice of the action the Committee is considering taking;

3. (1) This Regulation applies only with respect to the plants listed in Schedule 1.

(2) This Regulation does not apply with respect to the discharge of effluent to a municipal sanitary sewer.

OBLIGATIONS UNDER APPROVALS, ORDERS, ETC.

4. For greater certainty, subject to subsection 186 (4) of the Act, the requirements of this Regulation are in addition to and independent of requirements in an approval, order, direction or other instrument issued under any Act.

NON-APPLICATION OF THE GENERAL EFFLUENT MONITORING REGULATION

5. This Regulation is not a Sectoral Effluent Monitoring Regulation within the meaning of Ontario Regulation 695/88.

BY-PASSES

6. Beginning on February 16, 1998, a discharger shall not permit effluent that would ordinarily flow past a sampling point established

under this Regulation to be discharged from the discharger's plant without flowing past that sampling point, regardless of whether it would be convenient to do so because of a maintenance operation, a breakdown in equipment or any scheduled or unscheduled event.

SAMPLING AND ANALYTICAL PROCEDURES

7. (1) Each discharger shall carry out the establishment of sampling point obligations of this Regulation and the sampling and analysis obligations of this Regulation, including quality control sampling and analysis obligations, in accordance with the procedures described in the Ministry of Environment and Energy publication entitled "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater", dated August, 1994.

(2) Each discharger shall maintain the sampling equipment used at the discharger's plant for sampling required by this Regulation in a way that ensures that the samples collected at the plant under this Regulation accurately reflect the level of discharge of each limited parameter, merged parameter, assessment parameter and specific parameter from the plant.

PART II SAMPLING POINTS

ESTABLISHMENT AND ELIMINATION OF SAMPLING POINTS

8. (1) Each discharger shall, by May 15, 1995, establish a sampling point at each sampling point location designated as a process effluent sampling point in Schedule 2 for the discharger's plant.

(2) Each discharger shall, by May 15, 1995, establish a sampling point at each sampling point location designated as a process effluent batch sampling point in Schedule 4 for the discharger's plant.

(3) Each discharger shall, by May 15, 1995, establish a sampling point at each sampling point location designated as a merged effluent sampling point in Schedule 5 for the discharger's plant.

(4) Each discharger shall, by May 15, 1995, establish a sampling point at each sampling point location designated as a cooling water effluent sampling point in Schedule 6 for the discharger's plant.

(5) If the Director is satisfied, on the basis of written submissions from a discharger, that one or more of the circumstances described in subsection (6) exist at the discharger's plant, with the result that it is impractical to maintain or use a sampling point established at the plant under this Regulation, the Director may give the discharger written permission to eliminate the sampling point.

(6) For the purposes of subsection (5), the circumstances at the discharger's plant that might make it impractical to maintain or use a sampling point are the following:

1. A process change or redirection of or change in the character of an effluent stream has occurred or is expected to occur at the discharger's plant.
2. Equipment used for sampling or flow measurement at the sampling point is damaged or non-functional.
3. The effluent flowing in the stream on which the sampling point was established under this Regulation has been or is expected to be permanently eliminated.

(7) Where a discharger is permitted to eliminate a sampling point because of a circumstance described in paragraph 1 or 2 of subsection (6), the discharger shall, within 90 days after the day on which the sampling point is eliminated, establish a replacement sampling point.

(8) The replacement sampling point shall be established on the effluent stream from which the sampling point was eliminated, at a location approved in writing by the Director.

(9) The Director shall not approve a location for the replacement sampling point unless he or she is satisfied that monitoring at the new location would yield results that would reflect the level of discharge of each limited parameter, merged parameter and assessment parameter from the discharger's plant as reliably as did monitoring at the eliminated sampling point.

(10) A discharger who replaces a sampling point under subsection (7) has all the same obligations in connection with the replacement sampling point that the discharger had in connection with the eliminated sampling point.

REPORTS ON SAMPLING POINTS

9. (1) By May 25, 1995, each discharger shall submit to the Director a list and plot plan showing the sampling points established under this Regulation at the discharger's plant as of May 15, 1995.

(2) Each discharger who eliminates a sampling point at the discharger's plant under subsection 8 (5) but is not required to replace the sampling point under subsection 8 (7) shall, within 30 days after the day on which a sampling point is eliminated, give the Director a written notice describing where the sampling point used to be, together with a revised list and plot plan without the sampling point.

(3) Within 30 days after replacing a sampling point under subsection 8 (7), the discharger shall give the Director a written notice describing the location of the replacement sampling point, together with a revised list and plot plan showing the replacement sampling point.

USE OF SAMPLING POINTS ESTABLISHED UNDER THIS PART

10. Except as permitted or required under section 25, each discharger shall use the sampling points established under this Part for all sampling required by this Regulation.

PART III CALCULATION OF LOADINGS

PART V MONITORING

MONITORING—GENERAL

18. (1) Where a discharger is required by this Regulation to pick up a set of samples and analyze it for certain parameters, the discharger shall pick up a set of samples sufficient to allow all the analyses to be performed.

(2) A discharger shall use all reasonable efforts to ensure that all analyses required by this Regulation are completed as soon as reasonably possible and that the results of those analyses are made available to the discharger as soon as reasonably possible.

(3) Subject to subsection (4), each discharger shall pick up all sets of samples required to be picked up at the discharger's plant under sections 19, 20, 21, 23 and 32 between the hours of 7 a.m. and 10 a.m.

(4) If the Director is satisfied, on the basis of written submissions from a discharger, that the circumstances at the discharger's plant are such that it would be impractical to pick up a set of samples from each sampling point established at the plant under this Regulation within the time period specified in subsection (3), the Director may give the discharger a written notice in respect of the plant, varying the time period specified in subsection (3).

(5) Subject to subsections (6) and (7), where a discharger is required by section 19, 20, 21, 23 or 32 to pick up a set of samples the discharger shall pick up a set collected over the 24-hour period immediately preceding the pick-up.

(6) The 24-hour period referred to in subsection (5) may be shortened or enlarged by up to three hours to permit a discharger to take advantage of the three-hour range specified in subsection (3) or of a different three-hour period specified in a notice under subsection (4).

(7) Where a notice has been given under subsection (4) in respect of a plant specifying a time period longer than three hours, the 24-hour period referred to in subsection (5) may be shortened or enlarged by up to that longer amount of time to permit the discharger to take advantage of the time period specified in the notice.

(8) If the circumstances at a plant change so that the Director is satisfied that the circumstances described in subsection (4) no longer apply at the plant, the Director may revoke a notice given in respect of a plant under subsection (4) by giving a notice of revocation in writing to a discharger for the plant.

(3) A discharger is relieved of the obligations under subsection (1) relating to a parameter and shall instead, on three days in each week, pick up a set of samples collected at each process effluent sampling point at the discharger's plant and analyze each set of samples for the parameter where,

(a) the discharger has performed monitoring under subsection (1) for 12 consecutive months; and

(b) the monthly average process effluent plant loading for the parameter, for each of the 12 months, as calculated under subsection 12 (6), is equal to or less than 75 per cent of the monthly average plant loading limit for the parameter as set out in Column 4 of Schedule 2 for the discharger's plant.

(4) There shall be an interval of at least 24 hours between successive pick-up days at the plant under subsection (3).

(5) All samples picked up under subsection (3) in a week shall be picked up on the same three days in the week.

(6) Subsection (3) ceases to apply in relation to a parameter and a discharger shall instead comply with the requirements of subsection (1) in relation to the parameter where, during any 12 consecutive months,

(a) a daily process effluent plant loading for the parameter, as calculated under subsection 12 (3), exceeds the daily plant loading limit for the parameter as set out in Column 3 of Schedule 2 for the discharger's plant, on any three occasions; or

(10) For the purposes of subsection (9), the monthly average daily production of a material for a month at the discharger's plant is the amount of the material, calculated in tonnes, that is produced at the discharger's plant during the month, divided by the number of days in the month.

(11) For the purposes of subsection (8), the reference daily rate of production for a material at the discharger's plant is the arithmetic mean of the amounts calculated under subsection (9) for the material for the first 12 months for which the discharger is required to keep a record for the material under subsection (9).

(12) Subject to subsection (13), each discharger shall make each record required by this section as soon as reasonably possible and shall keep each such record for a period of three years.

(13) Each discharger shall keep each record required by subsections (8) and (9) for a period of 10 years.

(14) Each discharger shall ensure that all records kept under this section are available to Ministry staff at the discharger's plant, on request during the plant's normal office hours.

REPORTS AVAILABLE TO THE PUBLIC

38. (1) On or before June 1 in each year, each discharger shall prepare a report relating to the previous calendar year and including,

- (a) a summary of plant loadings calculated under sections 12 to 15;
- (b) a summary of batch stream loadings calculated under section 13;
- (c) a summary of the results of monitoring performed under sections 19 to 23, 25 to 27 and 31 to 33;
- (d) a summary of calculations performed under subsections 35 (1), (4) and (7);
- (e) a summary of the loadings or other results that exceeded a limit under section 16 or 17; and
- (f) a summary of the incidents in which effluent that would ordinarily flow past a sampling point established under this Regulation is discharged from the discharger's plant without flowing past that sampling point.

(2) Each discharger shall ensure that each report prepared under subsection (1) is available to any person at the discharger's plant, on request, during the plant's normal office hours.

(3) Each discharger shall provide the Director, upon request, with a copy of any report that the discharger has prepared under subsection (1).

(4) Each discharger shall ensure that each report prepared under section 30 is available to any person at the discharger's plant, on request, during the plant's normal office hours.

REPORTS TO THE DIRECTOR—GENERAL

39. (1) Each discharger shall notify the Director in writing of any change of name or ownership of the discharger's plant occurring after February 14, 1995, within 30 days after the end of the month in which the change occurs.

(2) Each discharger shall notify the Director in writing of any process change or redirection of or change in the character of an effluent stream that affects the quality of effluent at any sampling point established under this Regulation at the discharger's plant, within 30 days of the change or redirection.

(3) A discharger need not comply with subsection (2) where the effect of the change or redirection on effluent quality is of less than one week's duration.

(4) Each discharger shall notify the Director in writing if the discharger's plant has, for 90 consecutive days, produced a material listed in Schedule 10 for the discharger's plant at less than 75 per cent of the reference daily rate of production calculated under subsection 37 (8) for the material, within 30 days of the end of the 90-day period.

REPORTS TO THE DIRECTOR— COMPLIANCE WITH SECTION 6 AND PART IV

40. (1) Each discharger shall report to the Director any incident in which effluent that would ordinarily flow past a point established under this Regulation is discharged from the discharger's plant without flowing past that sampling point.

(2) Each discharger shall report to the Director any loading or other result that exceeds a limit prescribed by section 16 or 17.

(3) A report required under subsection (1) or (2) shall be given orally, as soon as reasonably possible, and in writing, as soon as reasonably possible.

QUARTERLY REPORTS TO THE DIRECTOR

41. (1) No later than 45 days after the end of each quarter, each discharger shall submit a report to the Director containing information relating to the discharger's plant throughout the quarter as required by subsections (3) to (8).

(2) A report under this section shall be submitted both in an electronic format acceptable to the Director and in hard copy generated from the electronic format and signed by the discharger.

(3) A report under this section shall include all information included in a report given under section 40 during the quarter.

(4) Each discharger shall report, for each month in the quarter,

(a) the monthly average plant loadings and the highest and lowest daily plant loadings calculated under section 12 for each limited parameter;

(b) the highest and lowest batch stream loadings calculated under section 13 for each limited parameter;

(c) the monthly average plant loadings and the highest and lowest daily plant loadings calculated under section 14 for each merged parameter;

(d) the monthly average plant loadings and the highest and lowest daily plant loadings calculated under section 15 for each assessment parameter.

(5) Each discharger shall report, for each month in the quarter,

(a) the monthly average process effluent plant volume and the highest and lowest daily process effluent plant volumes calculated under section 35;

(b) the highest and lowest process effluent batch volumes calculated under subsection 34 (5);

(c) the monthly average merged effluent plant volume and the highest and lowest daily merged effluent plant volumes calculated under section 35; and

(d) the monthly average cooling water effluent plant volume and the highest and lowest daily cooling water effluent plant volumes calculated under section 35.

(6) Each discharger shall, for each sampling point established under this Regulation at the discharger's plant, report the number of days in each month in the quarter on which effluent flowed past the sampling point.

(7) Each discharger shall report, for each month in the quarter, the highest and lowest pH results obtained under section 25 for each process effluent monitoring stream and each process effluent batch monitoring stream at the discharger's plant.

(8) Each discharger shall report, for each month in the quarter, the highest and lowest pH results and the highest and lowest specific conductance results obtained under section 33 for each merged effluent monitoring stream and each cooling water effluent monitoring stream at the discharger's plant.

REPORTS TO THE DIRECTOR—CHRONIC TOXICITY TESTING

42. (1) Each discharger shall report to the Director the results of all monitoring performed under section 31, together with the date on which each sample was picked up, no later than 60 days after the end of each semi-annual period in which the monitoring was performed.

(2) A report under subsection (1) shall include a plot of percentage reduction in growth or reproduction against the logarithm of test concentration and shall include a calculation of the concentration at which a 25 per cent reduction in growth or reproduction would occur.

MONITORING REGULATION

5. This Regulation is not a Sectoral Effluent Monitoring Regulation within the meaning of Ontario Regulation 695/88.

BY-PASSES

6. Beginning on February 16, 1998, a discharger shall not permit effluent that would ordinarily flow past a sampling point established under this Regulation to be discharged from the discharger’s plant without flowing past that sampling point, regardless of whether it would be convenient to do so because of a maintenance operation, a breakdown in equipment or any scheduled or unscheduled event.

SAMPLING AND ANALYTICAL PROCEDURES

7. (1) Each discharger shall carry out the establishment of sampling point obligations of this Regulation and the sampling and analysis obligations of this Regulation, including quality control sampling and

analysis obligations, in accordance with the procedures described in the Ministry of Environment and Energy publication entitled "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater", dated August, 1994.

(2) Each discharger shall maintain the sampling equipment used at the discharger's plant for sampling required by this Regulation in a way that ensures that the samples collected at the plant under this Regulation accurately reflect the level of discharge of each limited parameter, merged parameter, assessment parameter and specific parameter from the plant.

PART II SAMPLING POINTS

ESTABLISHMENT AND ELIMINATION OF SAMPLING POINTS

8. (1) Each discharger shall, by May 15, 1995, establish a sampling point at each sampling point location designated as a process effluent sampling point in Schedule 2 for the discharger's plant.

(2) Each discharger shall, by May 15, 1995, establish a sampling point at each sampling point location designated as a process effluent batch sampling point in Schedule 4 for the discharger's plant.

(4) Each discharger shall, by May 15, 1995, establish a sampling point at each sampling point location designated as a cooling water effluent sampling point in Schedule 6 for the discharger's plant.

(5) If the Director is satisfied, on the basis of written submissions from a discharger, that one or more of the circumstances described in subsection (6) exist at the discharger's plant, with the result that it is impractical to maintain or use a sampling point established at the plant under this Regulation, the Director may give the discharger written permission to eliminate the sampling point.

(6) For the purposes of subsection (5), the circumstances at the discharger's plant that might make it impractical to maintain or use a sampling point are the following:

1. A process change or redirection of or change in the character of an effluent stream has occurred or is expected to occur at the discharger's plant.
2. Equipment used for sampling or flow measurement at the sampling point is damaged or non-functional.
3. The effluent flowing in the stream on which the sampling point was established under this Regulation has been or is expected to be permanently eliminated.

(7) Where a discharger is permitted to eliminate a sampling point because of a circumstance described in paragraph 1 or 2 of subsection (6), the discharger shall, within 90 days after the day on which the sampling point is eliminated, establish a replacement sampling point.

(8) The replacement sampling point shall be established on the effluent stream from which the sampling point was eliminated, at a location approved in writing by the Director.

(9) The Director shall not approve a location for the replacement sampling point unless he or she is satisfied that monitoring at the new location would yield results that would reflect the level of discharge of each limited parameter, merged parameter and assessment parameter from the discharger's plant as reliably as did monitoring at the eliminated sampling point.

(10) A discharger who replaces a sampling point under subsection (7) has all the same obligations in connection with the replacement sampling point that the discharger had in connection with the eliminated sampling point.

REPORTS ON SAMPLING POINTS

9. (1) By May 25, 1995, each discharger shall submit to the Director a list and plot plan showing the sampling points established under this Regulation at the discharger's plant as of May 15, 1995.

(5) Instead of complying with subsections (1) to (4) with respect to a sampling point, a discharger may use an on-line analyzer at the sampling point on the stream and analyze the effluent at the sampling point for the parameter pH once in each day during the time period applicable to the plant under subsection 18 (3) or (4), and two more times in each 24-hour period beginning with the first analysis at the plant under this subsection in each day.

(6) There shall be an interval of at least four hours between each of the three analyses at a sampling point under subsection (5) in each 24-hour period.

APPENDIX I

Definition

Derivatives are financial contracts whose values are derived from the value of an underlying asset or index such as : interest rates, exchange rates, commodities, equities and options.

Derivatives allow credit unions and caisses populaires to identify, isolate and separately manage the market risks in financial instruments for the purpose of hedging, speculating, arbitrating price differences

and adjusting portfolio risks. The risks associated with derivatives include market risk (currency, interest rate risks and market price risk), credit risk and liquidity risk.

Credit union and caisses populaires may only use derivatives for hedging as part of their asset and liability management. Prior to entering into a derivative contract, credit unions and caisses populaires must identify these types of contracts in their written policies and procedures as a permitted investment and, as a minimum, address the following items:

The credit union/caisse populaire's policies and procedures for derivative products must specify that derivatives may only be used for hedging purposes. Hedging is defined as follows:

Hedging

In determining whether a position is a hedge, the credit union/caisse populaire must ensure that:

- the position to be hedged is specifically identified and exposes the credit union to risk of loss from price/interest rate changes;
- the instrument is specifically designated as a hedge as evidenced by the board minutes and management reports;
- it is clearly stated that changes in the fair value of the instrument designated as a hedge and opposite changes in the fair value of the position being hedged will correlate closely, so that the hedging instrument will be effective in eliminating or substantially reducing the risk of loss from the position being hedged.

Note: Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Role of the Board of Directors

The board of directors or a subcommittee of the board should approve and annually review all significant policies governing a credit union's or caisse populaire's use of derivatives.

The policies should:

- authorize for specific individuals to transact and manage the level of risk exposure;
- establish a process for such authorized persons to report on derivative transactions;
- specify the objectives and the risk exposure limits taking into consideration:
 - the profitability and capital level of the credit union or caisse populaires;
 - the credit union/caisse populaire's business strategy;
 - the volatility, marketability and potential loss from the derivative product,
 - the level of expertise of its management and trading staff.
- quantify the level of risk exposure based on clearly identifiable targets e.g. rates of return, entry/exit prices, etc.
- describe appropriate corrective action when the credit union's use of derivative products contravenes approved policies and when the level of risk exposure exceeds approved limits.

The Role of Management

Management is responsible for identifying all potential risk associated with the derivative product (e.g. market, liquidity, price) and developing risk limit policies for approval by the board of directors. Management must also:

- actively monitor transactions and positions for adherence to policy limits;
- develop analytical models and valuation systems to assess the level of risk exposure;
- design hypothetical scenarios to measure the impact of market conditions that may adversely affect the financial position of the credit union/caisse populaire;
- review the performance of the derivative product in mitigating the identified risk;
- review the performance of analytical models and valuation systems against actual experience;
- develop all other necessary operational procedures to ensure that appropriate systems and controls are in place to safeguard the credit union's or caisse populaire's assets and that only authorized transactions are entered into;
- regularly review the current and future information systems requirements for investments by the credit union or caisse populaire;
- ensure compliance with regulatory, tax and legal requirements;
- report to the board at least monthly on all of the above items.

Disclosure

The credit union is responsible for:

- establishing policies and procedures for recording and presenting derivative transactions;
- ensuring that the accounting practices for derivative products complies with the requirements of the Act, Regulations and Guidelines.

ACCOUNTING PRINCIPLES FOR DERIVATIVE INSTRUMENTS

Ministry of Finance
March 1, 1995

Introduction

The following are guidelines on the accounting methods and disclosure of derivative instruments for Ontario's credit unions and caisses populaires. Unless otherwise stated, the requirements outlined in this paper apply to leagues.

Definitions

Financial derivatives are financial contracts whose values are derived from the value of an underlying asset or index such as : interest rates, exchange rates, commodities, equities, debt obligations, indexes.

An option is a financial contract to buy or sell a standard quantity of a specified underlying asset on a specified future date at an agreed price.

Interest rate swap is an agreement between two parties to exchange interest payments, usually in which one party agrees to make payments, at a fixed interest rate and the other party agrees to make payments at a floating interest rate, predicated on notional principal value.

Interest rate swaps

If a credit union/caisse populaire enters into an interest rate swap or similar agreement, and the purpose of the transaction is to hedge against interest rate or similar risk associated with its specific assets and liabilities or groups of specific assets and liabilities through a compensatory price movement contract, the net interest shall be recorded in the income accounts as it occurs.

Initial recognition of a financial derivative

A financial derivative should be recognized on a credit union/caisse populaire's balance sheet when:

- (a) substantially all of the risks or rewards associated with the asset or liability have been transferred to the credit union/caisse populaire; and
- (b) the cost or fair value of the asset to the credit union/caisse populaire or the amount of the obligation assumed can be measured reliably.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Identification of a hedge

A derivative instrument should be accounted for as a hedge when:

- the position to be hedged is specifically identified and exposes the credit union to risk of loss from price/interest rate changes;
- the instrument is specifically designated as a hedge in minutes of a meeting of the board of directors;
- it is clear that changes in the fair value of the instrument designated as a hedge and opposite changes in the fair value of the position being hedged will correlate closely, so that the hedging instrument will be effective in eliminating or substantially reducing the risk of loss from the position being hedged.

Income recognition of gain or loss on a hedging instrument

In general, a gain or loss from a change in the fair value of a financial instrument accounted for as a hedge should be recognized in income when the corresponding loss or gain from a change in the fair value of the hedged position is recognized in income.

Discontinuance of hedge accounting

If a financial derivative classified as a hedge ceases to satisfy all of the conditions noted above, on the date it ceases to do so, the hedging instrument should be reclassified in accordance with the following paragraph.

Financial derivatives shall be marked-to-market daily on an individual contract basis, any unrealized loss or gain shall be recognized on that basis in the income accounts.

General disclosure requirements

For each type of derivative instrument, whether recognized or unrecognized, a credit union/caisse populaire should disclose information about the extent and nature of these instruments, including significant terms and conditions that may affect the amount, timing and certainty of future cash flows.

Disclosures concerning hedges of anticipated future transactions

When a credit union/caisse populaire has designated a financial instrument as a hedge of an identified future transaction, it should disclose in the audited financial statements or note thereof:

- (a) the nature of the identified transaction;
- (b) the amount of the deferred or unrecognized gain or loss; and
- (c) the period of time until the anticipated transaction is expected to occur.

Conclusion

The principles outlined in this paper should help credit unions and caisses populaires and their auditors account for and disclose their investments in derivatives in an appropriate and consistent manner.

CAPITAL ADEQUACY GUIDELINE FOR ONTARIO'S CREDIT UNIONS AND CAISSES POPULAIRES

Ministry of Finance
March 1, 1995

Introduction

Credit unions and caisses populaires are required to meet capital adequacy standards prescribed by the regulations as well as these guidelines. For this purpose, the Director has established for credit unions and caisses populaires two minimum standards: a capital to assets ratio and a risk-based capital ratio. The first provides a minimum level of capital in relation to a unit's total assets. The second focuses on the credit risk of specific on- and off-balance sheet asset categories.

Similarly, leagues are required to meet capital adequacy standards prescribed by the regulations as well as these guidelines. For this purpose, the Director has established for leagues one minimum standard: a capital to assets test. This provides an overall measure of the adequacy of league's capital in relation to its assets.

Risk-Based Capital

Credit unions and caisses populaires must meet capital adequacy requirements on both an unconsolidated basis (i.e. the legal entity) and a consolidated basis unless the Director permits otherwise. The consolidated basis includes all of the credit union's subsidiaries as defined by the *Credit Unions and Caisses Populaires Act, 1994* except insurance subsidiaries or other regulated financial institutions whose leverage is inappropriate for a deposit-taking institution and who, because of their size, would have a material impact on the consolidated entity.

Under the risk-based capital adequacy framework, a financial institution's minimum capital requirement is defined as a ratio of total capital (the **numerator**) divided by risk-weighted assets and risk-weighted off-balance sheet items (the **denominator**). Generally, the risk weighting will be assigned based on an assessment of the counterparty or, if relevant, of the guarantor or of the collateral. The regulation and/or guidelines may in future be adjusted by the Director so that other risks - interest rate risk, position risk, and foreign exchange risk - may be formally considered.

All credit unions will be required to meet yearly, incremental targets for adequate capital as prescribed by regulation. Any credit union or caisse populaire that does not meet the annual target or is below the minimum capital to assets target will be required to obtain a variance from the Director of Credit Unions.

Capital to Assets

All credit unions and caisses populaires are required to meet a capital to assets test. The capital to assets ratio is calculated by dividing the unit's total capital, by its total assets. The required levels of capital are outlined in Part V of the Regulations made under the Act.

Payment of Dividends

The Director of Credit Unions may, according to the terms of its variance, limit a unit's ability to pay dividends. In general, the Director will exercise his discretion according to the following criterion: if the risk-based capital ratio or the capital to assets ratio is below the prescribed level, cash dividends will not be permitted, but share dividends may be permitted.

Although the guidelines do not prescribe a minimum level of retained earnings, the Ministry continues to view retained earnings as a preferred form of equity. Where a credit union or caisse populaire makes a dividend payment from previous years earnings, the Director may view this practice as a potential impairment of capital and erosion of the unit's financial position and may exercise his discretion under subsection 85(1) to require additional capital.

Capital Adequacy Requirements for Leagues

All leagues are required to meet a capital to assets test. The capital to assets ratio is calculated by dividing the league's total capital, by its total assets. The required level of capital are outlined in Part V of the Regulations made under the Act.

Leagues will not be required to meet a risk-weighted test. Any league that does not meet its capital adequacy requirement must obtain a variance from the Director of Credit Unions. As part of the variance, the Director may set annual targets. A league that falls below these targets will not be permitted to pay a cash dividend but may be permitted to pay a share dividend.

Calculation of the Capital to Assets Ratio

All credit unions and caisses populaires and leagues will be required to maintain the prescribed level of capital throughout its fiscal year. However, for the purposes of measuring compliance based on the audited financial statements produced at the fiscal year end an adjustment may be made to "total assets" on the following condition. Where a credit union/caisse populaire or league experiences an unusually large influx of deposits (which would cause it to be in non-compliance with the capital to assets test) within the last 5 business days of its fiscal year end, it may reduce its total assets by these deposits. The amount of these deposits is a net amount after deducting withdrawals over the same period.

DEFINITION OF CAPITAL

The three primary considerations for determining whether capital of a credit union or caisse populaire qualifies for capital adequacy are its:

- relative permanence;
- freedom from mandatory fixed charges against earnings; and
- subordination of legal position to the rights of depositors and other creditors of the credit union.

Note: The concepts of "permanence", "freedom from mandatory fixed charges" and "subordination" are further defined in Appendix I.

Total capital is made up of two tiers. Tier 1 capital ("core capital") is the highest quality. Tier 2 capital ("supplementary capital") falls short in either of permanence or freedom from charges, but contributes to the overall strength of a financial institution as a going concern. Tier 1 or tier 2 shares may contain a feature that permits redemption upon the death or expulsion of the member without changing its classification as either tier 1 or tier 2. The capital elements in tier 1 and 2 capital, as well as the various limits, restrictions and deductions to which they are subject, are specified next.

Tier 1 Capital

Tier 1 capital is restricted to:

- member equity, defined to include membership shares, contributed surplus, reserves, and retained earnings;
- 90% of the issued and outstanding qualifying non-cumulative, non-membership shares (where these shares have a 10% redeemability);
- 100% of qualifying non-cumulative, non-membership shares (where no redeemability feature exists) (see appendix I); and
- qualifying minority interests in subsidiaries arising on consolidation of tier 1 capital instruments;
- investments by the Deposit Insurance Corporation of Ontario or a stabilization authority as approved by the Director.

Tier 2 Capital

A capital instrument will qualify as tier 2 capital if it has an element of permanence, and has certain characteristics of both equity and debt. The maximum amount of these instruments that can be included in tier 2 capital is 100% of tier 1 capital.

Tier 2 will include the following instruments:

- Capital instruments that, at a minimum, have these characteristics:
 - 10% of tier 1 capital that are redeemable at the holder's initiative and have not been redeemed;
 - 90% of the issued and outstanding capital instruments that have a 10% redeemability feature;
 - 90% of the unamortized portion of qualifying redeemable shares and subordinated debentures;
 - 100% of the capital instruments that are not redeemable at the holder's initiative;
 - 100% of the capital instruments that may be redeemable by the credit union after an initial term of five years;
 - are available to participate in losses without triggering an end to ongoing operations or the start of insolvency proceedings; and
 - allow debt service obligations to be deferred (as with cumulative preferred shares) if the profitability of the credit union/caisse populaire would not support payment;
 - are unsecured, subordinated to the rights of depositors and other creditors of the credit union and fully paid up;

League Guarantee of Capital

Where a league or other body provides a guarantee of capital, which is satisfactory to the Director, the amount of this guarantee will be deducted from the capital of the league.

Qualifying Minority Interest

Minority interests arising on consolidation of a credit union's financial statements with those of its subsidiaries will be included in either tier 1 or tier 2 capital, provided:

- the instruments meet the criteria applicable to that category; and
- are subordinate to the rights of the credit union's depositors.

If a subsidiary issues capital instruments for the funding of its parent credit union or substantially in excess of its own requirements, the terms and conditions of the issue, as well as intercompany transfers, must ensure that members are placed in the same position as if the instrument was issued by the regulated credit union in order for it to qualify as capital on consolidation.

Deductions/Adjustments

Deductions from tier 1 capital include:

- goodwill.

Deductions from tier 1 and tier 2 capital include:

- appraisal increases;
- income tax recoverable that cannot be realized through a carry-back to preceding years;
- deferred tax debits that will not be realized in the following fiscal year;

- investments in unconsolidated subsidiaries and in corporations that are accounted for using the equity method of accounting, as well as capital issues between two or more financial institutions that represent, either, directly or indirectly, back-to-back placements.

RISK-WEIGHTED ASSETSOn-balance sheet (see Part V the regulations)

To derive the denominator of the risk-based capital ratio, the assets of a credit union/caisse populaire and credit equivalent amounts for off-balance sheet items are assigned risk categories as prescribed under the regulation. Generally, classification is according to the nature of the counterparty or, if relevant, of the guarantor or of the collateral.

Amounts included in these categories are multiplied by the risk weight for the category, with the resulting weighted values added together to arrive at total risk-weighted assets.

The amount of assets such as goodwill, investments in corporations carried on the equity method of accounting, or back-to-back securities that are deducted from capital are risk weighted at 0%. Where goodwill has been unconditionally guaranteed, it will not be deducted from Tier I capital.

Certain types of collateral (cash, government securities, residential mortgages) will be recognized for the purpose of reducing the credit risk of claims. That portion of a claim covered by collateral will be assigned the weight given to the collateral, provided that collateral represents more than 25% of the loan and the credit union/caisse populaire internally accounts separately for the calculation.

Off-balance sheet assets (for more details see Appendix II)

The face amount of an off-balance sheet instrument does not always reflect the amount of the credit risk. To approximate the potential credit exposure, the face amount of the instrument must be multiplied by a credit conversion factor to derive a credit equivalent. Broadly, the credit conversion factors are:

100% direct credit substitutes;

0% unused portions of commitments with an original maturity of one year or less or unconditionally cancellable at any time (e.g. normal line of credit).

The resulting credit equivalent is then treated in the same manner as an on-balance sheet instrument and is assigned the weight appropriate to the counterparty or, if relevant, the weight assigned to the guarantor or the collateral security.

A commitment involves an obligation (with or without a material adverse change or similar clause) of a credit union/caisse populaire to fund its member in the normal course of business should the member seek to draw down the commitment. Normally, commitments involve a written contract or agreement and a commitment fee or some other form of consideration.

APPENDIX I**NON-MEMBERSHIP SHARES (Tier 1)**

Other types of shares may qualify as tier 1 instruments depending on whether they are, in form and in substance:

- subordinated;
- relative permanence; and
- free of mandatory fixed charges.

Subordination

These shares must be subordinated to a credit union/caisse populaire's depositors and unsecured creditors. If shares are issued

by a subsidiary to fund the regulated parent company and are to qualify for capital (minority interest), the terms and conditions of the issue, as well as the intercompany transfer, must ensure that investors are placed in the same position as if the instrument were issued by the regulated parent company.

Permanence

To ensure that these shares are permanent, the following features are not permitted:

- retraction by the holder except under death or expulsion of a member;
- obligation for the issuer to redeem more than 10% of the outstanding shares;

For example, an issue would not be considered non-cumulative if it had a conversion feature that compensated for undeclared dividends. Similarly, a conversion feature that provided a return of capital or compensation for unpaid dividends would be unacceptable.

Free of Mandatory Fixed Charges

Shares included in tier 1 capital cannot offer the following:

- cumulative dividends;
- compensation to shareholders other than a dividend;
- sinking or purchase funds.

In addition, the non-declaration of a dividend cannot trigger restrictions on the credit union/caisse populaire other than requiring shareholder's approval before paying dividends on or retiring other shares.

To conform with accepted practice, in the event of non-declaration of a dividend, shareholder's approval of shares may be sought before:

- 1) paying dividends on any shares ranking junior to the shares (other than stock dividends in any shares ranking junior to the shares); or
- 2) redeeming, buying, or otherwise retiring any share ranking junior to the shares (except out of the net cash proceeds of a substantially concurrent issue of shares ranking junior to the shares); or
- 3) redeeming, buying, or otherwise retiring less than all such shares; or
- 4) except pursuant to any purchase obligation, sinking fund, retraction privilege, or mandatory redemption provisions attached to any series of shares, redeeming, buying, or otherwise retiring any shares at parity with such shares.

Examples of Acceptable Features

Outlined below are some share features that may be acceptable in tier 1 capital instruments:

- a dividend that floats at some fixed relationship to an index or the highest of several indices as long as the index or indices are linked to general market rates and not to the financial condition of the credit union/caisse populaire;
- a dividend rate that is fixed for a period of years and then shifts to a rate that floats over an index, plus an additional amount tied to the increase in share dividends if the index is not based on the credit union/caisse populaire's financial condition and the increase is not automatic nor of an exploding rate nature; and
- conversion of shares to another form of shares where the mini-

mum conversion value or the way it is to be calculated is established at the date of issue.

Examples of Unacceptable Features

Some share features that will not be acceptable in tier 1 capital are:

- an exploding rate share, where the dividend rate is fixed or floating for a period and then sharply increases to an uneconomically high level; and
- an auction rate share in which the dividend is reset periodically based, in whole or part, on the credit union/caisse populaire's financial condition.

Amortization

Tier 2 capital components are subject to straight-line amortization in the last five years before maturity or the effective dates governing holders' retraction rights. Hence, as redeemable shares and subordinated debentures of the credit union/caisse populaire or minority interest shares and qualifying instruments issued by a subsidiary, approach maturity, redemption, or retraction, such outstanding balances are to be amortized as follows:

Years to Maturity	Included in Capital
5 years or more	100%
less than 5 years or more than 4	80%
less than 4 years or more than 3	60%
less than 3 years or more than 2	40%
less than 2 years or more than 1	20%
Less than 1 year	0%

Similarly for capital instruments that have sinking funds, amortization of the amount paid into the sinking fund should begin five years before payment is made. This is required because the amount in the sinking fund is not subordinated to the rights of depositors.

APPENDIX II OFF-BALANCE SHEET CATEGORIES

The definitions in this section apply to off-balance sheet exposures.

Direct Credit Substitutes (100% conversion factor)

Direct credit substitutes include guarantees or equivalent instruments backing financial claims. With a direct credit substitute, the risk of loss to a credit union/caisse populaire is directly dependent on the credit worthiness of the counterparty.

Direct credit substitutes include:

- guarantees given by the credit union/caisse populaire on behalf of members to stand behind a member's financial obligations and to satisfy these obligations should the member fail to do so; examples of such are:
 - existing indebtedness for services,
 - purchase agreements,
 - leases,
 - certified cheques,
 - sales taxes,
 - existing indebtedness for merchandise purchased.
- letters of credit given on behalf of a member.

Occupational Exposure Limits/ Limites d'exposition professionnelle

NOTICE OF PROPOSED CHANGES TO OCCUPATIONAL EXPOSURE LIMITS OF 113 SUBSTANCES

Notice is hereby given of proposed changes to the Occupational Exposure Limits of the 113 substances listed in the attached Table. The Table lists the current limits that are included in the Regulation respecting Control of Exposure to Biological or Chemical Agents (O. Reg. 833), and in certain designated substance regulations made under the *Occupational Health and Safety Act*, R.S.O. 1990, c. O.1. The proposed new limits for these substances are underlined in the Table.

The background provided in the Notice of Intent to Review Specific Occupational Exposure Limits, published in *The Ontario Gazette* on October 26, 1991, stated that the Joint Steering Committee on Hazardous

Substances in the Workplace was established by the Minister of Labour to develop and review regulations designed to control worker exposure to hazardous substances, under the *Occupational Health and Safety Act*. The work of the Joint Steering Committee involves achieving consensus on matters such as: determining priorities for substances to be regulated; developing a process for updating the Regulation respecting Control of Exposure to Biological or Chemical Agents, (O. Reg. 833); and examining new approaches to the regulation of toxic substances.

The Occupational Exposure Limits Task Force of the Joint Steering Committee, consisting of labour and management representatives and chaired by the Ministry, is conducting the Interim Process for Reviewing and Revising Occupational Exposure Limits. This process involves soliciting public input to the Task Force on the socio-economic impact in Ontario of the proposed new limits. The substances to be included in the Interim Process were selected following a review of exposure limits in five jurisdictions which follow a process for the setting of exposure limits based on labour-management consultation. The five jurisdictions are the United Kingdom, Germany, Sweden, Norway, and the Netherlands.

During the review process for the first 101 substances, the primary factor in deciding whether or not to lower limits was the potential economic impact. In keeping with the decision of my predecessor, I would like to restate that the availability of documentation from the foreign jurisdiction whose limit is considered for Ontario, while useful, was not critical to the setting of occupational exposure limits within the Interim Process. Based on this decision and the recommendations by the Task Force on other issues conveyed to me by the Joint Steering Committee, I am proposing the limits underlined for the respective substances in the attached Table. The proposed limits are the lowest values found in one or more of the five foreign jurisdictions. It is expected that the proposed limits would be adopted unless submissions received in the public review process demonstrate significant adverse economic impact.

In considering the technical and economic aspects of achieving compliance with these proposed occupational exposure limits, respondents should be aware that where typical exposure levels in the workplace may vary from day to day, it may be necessary to maintain typical exposures at levels lower than the stated occupational exposure limits in order to ensure compliance.

To demonstrate economic impact, a submission should describe:

1. The operations or processes which give rise to the exposures of concern;
2. Current exposure levels of the substance(s) under review in particular operations of concern (and information about whether the exposure levels are estimated or have been measured by air sampling);
3. The decrease in exposure which would be required to bring exposures into compliance with the proposed lower limit;
4. Changes in equipment or operations necessary to achieve and maintain compliance with the lower limit;
5. Costs of such changes;
6. Information on the impact of such costs relative to the financial status of the operation, company, and/or industry as a whole.

To demonstrate that a proposed limit is not reasonably practicable to achieve technically, a submission should describe:

1. The operations or processes which give rise to the exposures of concern;
2. Current exposure levels of the substance(s) under review in particular operations of concern (and information about whether the exposure levels are estimated or have been measured by air sampling);
3. The decrease in exposure which would be required to achieve and maintain compliance with the proposed lower limit;

4. A clear explanation of the conditions or circumstances which make it technically unfeasible to achieve compliance with the proposed limit.

I urge all respondents to concentrate their efforts to include complete, valid, detailed economic impact information in their briefs to allow for concrete decisions to be made.

Submissions should be sent to:

Dr. Barry Lubek
Regulation Development Unit
Occupational Health and Safety Branch
Ministry of Labour
400 University Avenue, 7th Floor
Toronto, Ontario - M7A 1T7

The deadlines for submissions are:

* Group 1 - June 9, 1995

* Group 2 - September 8, 1995

* Group 3 - December 8, 1995

(For Groups see Attachment.)

Submissions will be made available for public examination.

Approved by The Lieutenant Governor in Council,
Order in Council No. 336/95, February 15, 1995.

This Comprehensive Set of Provincial Policy Statements
was released by the Minister of Municipal Affairs on May 18, 1994.

It was issued under Section 3 of the Planning Act,
and came into effect on March 28, 1995.
It replaces four policy statements (Mineral Aggregate Resources,
Flood Plain Planning, Wetlands, and
Land Use Planning for Housing). The Policies of Goals A to F, inclusive,
should be read in conjunction with Section G, the Figures and
the Definitions section, all of which form a part of the
Comprehensive Set of Policy Statements.

Italicized terms are defined in the Definitions section.
If there is more than one definition for a term in the policy statements, a subscript will identify the definition which applies.
For example, intensification₂ refers to the second definition of intensification found in the Definitions section.

A Natural Heritage, Environmental Protection and Hazard Policies

GOAL 1

To protect the quality and integrity of ecosystems, including air, water, land, and biota; and, where quality and integrity have been diminished, to encourage restoration or remediation to healthy conditions.

1.1 Development_{1,2,3,4} may be permitted only if the quantity and quality of ground water and surface water are protected. Development_{1,2,3,4} that will negatively impact on ground water recharge areas, head-waters and aquifers which have been identified as sensitive areas will not be permitted

1.2 Natural heritage features and areas will be protected.

- a) Development_{1,2} will not be permitted in significant ravine, valley, river, and stream corridors, and in significant portions of the habitat of endangered species and threatened species.

Development_{1,2} will not be permitted on adjacent lands if it negatively impact the natural features or the ecological functions for which the area is identified.

- b) Except for the areas covered in a), significant portions of the habitat of vulnerable species, significant natural corridors, significant woodlands south and east of the Canadian Shield, areas of natural and scientific interest, shorelines of lakes, rivers and streams, and significant wildlife habitat will be classified into areas where either:

- 1) no development_{1,2} is permitted; or
- 2) development_{1,2} may be permitted only if it does not negatively impact the natural features or the ecological functions for which the area is identified.

Development_{1,2} will not be permitted on adjacent lands to 1) and 2) if it negatively impacts the natural features or the ecological functions for which the area is identified.

1.3 Development₂ may be permitted if it does not harmfully alter, disrupt or destroy fish habitat. There will be no net loss of productive capacity of fish habitat, and a net gain of productive capacity wherever possible.

1.4 In decisions regarding development₂, every reasonable opportunity should be taken to: maintain the quality of air, land, water, and biota; maintain biodiversity compatible with indigenous natural systems; and protect natural links and corridors. The improvement and enhancement of these features and systems is encouraged.

GOAL 2

To ensure that wetlands are identified and adequately protected through the land use planning process and to achieve no loss of provincially significant wetlands.

2.1 All planning jurisdictions including municipalities, planning boards

and resource management bodies shall protect provincially significant wetlands where they have been identified.

2.2 All planning jurisdictions, including municipalities and planning boards, are encouraged to protect other wetlands that are not provincially significant.

2.3 In the Great Lakes - St. Lawrence Region, development₂ shall not be permitted within provincially significant wetlands.

2.4 In the Great Lakes - St. Lawrence Region, on adjacent lands, development₂ may be permitted only if it does not result in any of the following:

- a) loss of wetland functions;
- b) subsequent demand for future development₂ which will negatively impact on existing wetland functions;
- c) conflict with existing site-specific wetland management practices; and
- d) loss of contiguous wetland area.

This shall be demonstrated by an environmental impact study (EIS), prepared in accordance with established procedures and carried out by a proponent, addressing a) to d) inclusive.

2.5 In the Boreal Region, in provincially significant wetlands and adjacent lands, development₂ may be permitted only if it does not result in any of the following:

- a) loss of wetland functions;
- b) subsequent demand for future development₂ which will negatively impact on existing wetland functions; and
- c) conflict with existing site-specific wetland management practices.

This shall be demonstrated by an environmental impact study (EIS), prepared in accordance with established procedures and carried out by a proponent, addressing a) to c) inclusive.

2.6 On adjacent lands, established agricultural activities are permitted without an EIS.

2.7 New utilities/facilities shall be located outside provincially significant wetlands wherever possible. Approval authorities shall consider alternative methods and measures for minimizing impacts on wetland functions when reviewing proposals to construct transportation, communication, sanitation and other such utilities/facilities in provincially significant wetlands.

GOAL 3

To ensure that development is not permitted in areas where site conditions or location may pose a danger to public safety or public health or result in property damage; and to encourage a coordinated approach to the use of land and the management of water in areas subject to flooding in order to minimize social disruption.

3.1 Great Lakes – St. Lawrence River system

3.1.1 On lands adjacent to the Great Lakes, their connecting channels and the St. Lawrence River shoreline, development₃ will generally be directed to areas outside of the regulatory shoreline.

The regulatory shoreline is comprised of three standards: the regulatory flood standard, the regulatory dynamic beach standard, and the regulatory erosion standard.

3.1.2 Development₃ will not be permitted within:

- a) the *regulatory dynamic beach standard*;
- b) the *regulatory flood standard* within the *defined portions of the one hundred year flood level along the connecting channels*; and
- c) the *regulatory shoreline* where the area is to be used for *institutional uses* or *essential emergency services* or for the disposal, manufacture, treatment or storage of *hazardous substances* and/or sewage.

3.1.3 *Development₃* may be permitted in areas within the *regulatory flood standard* and *regulatory erosion standard* where:

- a) the *flooding* and *erosion* hazards can safely be addressed;
- b) new or existing hazards are not created or aggravated;
- c) no adverse environmental effects will result;
- d) vehicles and people have a way of safely entering and exiting the area during times of *flooding* and *erosion* emergencies; and
- e) *development₃* is carried out in accordance with *established standards and procedures*.

3.2 Erosion Hazards

Development₃ adjacent to ravines, river valleys and streams should be restricted within the *one hundred year erosion limits*.

3.3 Hazardous Sites

Development₃ will be permitted on a *hazardous site* only if the site is/has been *rehabilitated* to remove or mitigate the hazard so that there is no remaining danger to public health or public safety or property damage.

Development₃ on or *adjacent* to lands affected by past mining activities will be permitted only if appropriate remediation or rehabilitation measures are undertaken to address and mitigate known or suspected *abandoned mine hazards* that may impact the proposed *development₃*.

Where lands affected by past mining activities have been *rehabilitated*, *development₃* or re-use of these lands will be permitted only if the proposed *development₃* will not alter, destroy, remove or impair any rehabilitation work; and if no danger to public health or public safety or property damage would result.

3.4 Contaminated Sites

Development₃ may be permitted on a *contaminated site* if the site is/has been rehabilitated or remediated and if it has been determined that no danger to public health or public safety or property damage would result.

3.5 Riverine Flood Plains

Municipalities and Planning Boards shall show and/or describe *flood plain* lands in official plans and zoning by-laws and incorporate policies so that new *development₃* does not create new or aggravate existing *flood plain* management problems.

3.5.1 One Zone Concept:

Subject to policies 3.5.2 and 3.5.3 inclusive:

- The *flood plain* will consist of one zone, defined by the *regulatory flood standard* (see Figure F2).
- In the *flood plain*, new *development₃* is to be prohibited or *restricted*.

3.5.2 Two Zone Concept:

For portions of *flood plains* that could potentially be safely developed with no adverse impacts, the Conservation Authorities in Ontario, or where no Conservation Authority exists, the Ministry of Natural Resources, in cooperation with the *watershed* municipalities, have the

option of selective application of the *two-zone (floodway-flood fringe) concept* (see Figure F3). The extent of the *floodway* is to be determined based on local *watershed* conditions, such as critical *flood* depth and velocity, existing and proposed *development₃*, and the potential for upstream and downstream impacts.

In the *floodway*, new *development₃* is to be prohibited or *restricted*.

In the *flood fringe*, new *development₃* that may be permitted is to be protected to the level of the *regulatory flood*.

3.5.3 Special Policy Area Concept:

Where strict adherence to policies 3.5.1 and 3.5.2 inclusive is not feasible, the concept of *special policy area* status is recognized as a possible option for *flood* prone communities or portions thereof. Municipalities may apply for *special policy area* status, in accordance with established procedures, and controlled *development₃* may be permitted once such status is obtained.

Municipalities shall delineate *special policy areas* in their official plans and include policies indicating the circumstances under which new *development₃* may be permitted and identifying the minimum acceptable *level of protection* required for new *development₃*.

3.5.4 Floodproofing:

In the *flood plain*, any new *development₃* permitted is to be protected by acceptable *floodproofing* actions or measures.

Ingress/egress for new buildings be such that vehicular and pedestrian movement is not prevented during times of *flooding*.

3.5.5 Public Safety:

Notwithstanding policies 3.5.1 to 3.5.4 inclusive, new *development₃* is not permitted in the *flood plain* where the use is:

- a) associated with the manufacture, storage, disposal and/or consumption of *hazardous substances* or the treatment, collection and disposal of sewage, which would pose an unacceptable threat to public safety if they were to escape their normal containment/use as a result of *flooding* or failure of *floodproofing* measures;
- b) associated with institutional services, such as hospitals, nursing homes and schools, which would pose a significant threat to the safety of the inhabitants (eg. the sick, the elderly the disabled or the young) if involved in an emergency evacuation situation as a result of *flooding* or failure of *floodproofing* measures; and
- c) associated with services such as those provided by fire, police and ambulance stations and electrical substations, which would be impaired during a flood emergency as a result of *flooding* or failure of *floodproofing* measures.

Where new *developments* identified in a), b) and c) above is not considered to pose an unacceptable risk to public safety, a higher level of flood protection and/or additional *floodproofing* precautions above the *regulatory flood level*, may still be required due to the sensitive nature of the *development₃*.

B Economic, Community Development, and Infrastructure Policies

GOAL

To manage growth and change to foster communities that are socially, economically, environmentally, and culturally healthy, and that make efficient use of land, new and existing infrastructure, and public services and facilities.

1. The linkages between social and human service needs and land use planning should be recognized in land use planning decisions; and opportunities for facilities and services, including *public service facilities*, should be provided to residents diverse in ability, age, income and culture.

2. Public streets and places, and facilities used by the public, should be planned to meet the needs of pedestrians and to be safe, lively and accessible to all, including the disabled.

3. The well-being of mainstreets and downtowns should be fostered.

4. Communities should be planned and developed to provide opportunities for a diversified economic base which:

- supports a healthy, stable economy;
- enhances employment opportunities;
- fosters and promotes sustainable economic activity;
- builds on the community's advantages; and
- integrates economic, social and environmental considerations.

In order to provide a coordinated approach to economic development, the preparation and implementation of economic development strategies is encouraged. The provision of *infrastructure* to support sustainable economic development should be addressed as a component of this strategy.

5. Communities will be planned to use land efficiently, promote the efficient use of *infrastructure* and *public service facilities*, and where transit systems exist or may be introduced in the future, support the use of public transit.

6. The efficiency of *transportation systems* will be maximized by integrating transportation modes, and making optimal use of existing and new *transportation systems*. Transportation plans should be coordinated with those of other relevant jurisdictions.

7. Servicing and *infrastructure* considerations will form an integral part of land use planning. Municipalities will plan servicing facilities which maintain or enhance the quality of the natural environment to accommodate expected growth. In areas serviced by *full municipal sewage and water services*, *development₁* will be permitted only if sufficient *reserve water and sewage plant capacity* is available to accommodate it.

Development₁ should be serviced by *full municipal sewage and water services* wherever feasible. Where *full municipal sewage and water services* are not provided, and where site conditions permit, *multi-lot/unit development₁* should be serviced by *public communal services*. Where the use of *public communal services* is not feasible, and where site conditions permit, *development₁* may be serviced by *individual on-site systems*. *Development₁* on *partial services* will be discouraged except in the situation where a *public communal service* is required to address remediation of failed *individual on-site systems*.

8. Where *settlement areas* within a municipality are serviced by *full municipal sewage and water services*:

- a) Opportunities will be provided in *built-up areas* for *intensification₁* and a *mix of uses*.
- b) Areas proposed for *development₁* which are within *settlement areas* but which are not *built-up areas*:
 - i) will be logical extensions of *built-up areas*, and will be serviced by *full municipal sewage and water services* with sufficient *reserve water and sewage plant capacity* to accommodate proposed *development₁*; and
 - ii) will have a compact form, a *mix of uses*, and densities that efficiently use land, *infrastructure*, and *public service facilities*.

c) Extensions to *settlement areas* will be permitted only if the following conditions are met:

- i) the amount of land included within extensions is justified, based on the amount of land available for *development₁* in the *settlement area*, and on population projections and employment targets for the municipality for a planning horizon of 15-20 years, unless a longer time period has been established for specific regional municipalities as a result of a comprehensive provincial planning exercise, such as that coordinated by the Province in the Greater Toronto Area;
- ii) areas proposed for *development₁* are logical extensions of the *settlement area*, and will be serviced by *full municipal sewage and water services* with sufficient *reserve water and sewage plant capacity* to accommodate proposed *development₁*;
- iii) a strategy for the staging, financing and construction of the *infrastructure* for the extension is formulated;
- iv) opportunities are provided in the *settlement area* for the efficient use of land, *infrastructure*, and *public service facilities* through *intensification₁*, a *mix of uses* and a compact form;
- v) the extension will have a compact form, a *mix of uses*, and densities that efficiently use land, *infrastructure*, and *public service facilities*; and
- vi) *prime agricultural areas* are included in the extension only if there is no reasonable alternative, but in all cases *specialty crop land* will be avoided.

9. Where *settlement areas* within a municipality are not serviced by *full municipal sewage and water services*:

- a) Areas proposed for *development₁* which are within the *settlement area* but which are not *built-up areas*:
 - i) will be logical extensions of *built-up areas*, and will be serviced by *public communal services* or *individual on-site systems*; and
 - ii) will have a compact form, and densities and uses appropriate to the *sewage and water systems* proposed.
- b) Extensions to the *settlement area* will be permitted only if the following conditions are met:
 - i) the amount of land included within extensions is justified, based on the amount of land available for *development₁* in the *settlement area*, and on population projections and employment targets for the municipality for a planning horizon of 15-20 years, unless a longer time period has been established for specific regional municipalities as a result of a comprehensive provincial planning exercise, such as that coordinated by the Province in the Greater Toronto Area;
 - ii) areas proposed for *development₁* will be logical extensions of the *settlement area*;
 - iii) a strategy for the staging, financing and provision of any required *infrastructure* for the extension is formulated;
 - iv) the long-term suitability of the site for *public communal services* or *individual on-site systems* is demonstrated; and
 - v) the extension will have a compact form, and densities and uses appropriate to the *sewage and water systems* proposed; and
 - vi) *prime agricultural areas* are included in the extension

only if there is no reasonable alternative, but in all cases *specialty crop land* will be avoided.

10. In *rural areas* within a municipality:

- a) Residential *development₁* that is not an extension of a *settlement area* will be permitted only if the following conditions are met:
 - i) the demand for the type and scale of *development₁* is justified based on population projections for the municipality for a planning horizon of 15-20 years and the amount of suitable land available for the proposed type of *development₁* in *settlement areas* within the municipality; and
 - ii) the reasonably anticipated effects of *development₁* on *rural and recreational characteristics* are assessed and are acceptable; and
 - iii) the long-term suitability of the site for *public communal services* or *individual on-site systems* is demonstrated; and
 - iv) the long-term public costs of *infrastructure, public services and public service facilities* are assessed and are acceptable.
- b) Recreational and tourism *development₃* that is not an extension of a *settlement area* will be permitted only if the following conditions are met:
 - i) the type and scale of *development₃* is justified based on the demand for the *development₃* and the amount of suitable land available for the proposed type of *development₃* in *settlement areas* within the municipality;
 - ii) the reasonably anticipated effects of *development₃* on *rural and recreational characteristics* and on natural features and functions are assessed and are acceptable;
 - iii) the long-term suitability of the site for *public communal services* or *individual on-site systems* to accommodate proposed uses is demonstrated; and
 - iv) the long-term public costs of *infrastructure, public services and public service facilities* are assessed and are acceptable.
- c) Industrial, commercial and institutional *development₃* should be directed to *settlement areas*, but small-scale industrial, commercial and institutional *development₃*, serving the needs of the rural and agricultural area will be permitted only if the following conditions are met:
 - i) the type and scale of *development₃* is justified based on demand, the suitability of the use for location in *settlement areas* within the municipality, and, where applicable, the municipality's economic development strategy;
 - ii) the reasonably anticipated effects of *development₃* on *rural and recreational characteristics* and on natural features and functions are assessed and are acceptable;
 - iii) the long-term suitability of the site for *public communal services* or *individual on-site systems* to accommodate the use is demonstrated; and
 - iv) the long-term public costs of *infrastructure, public services and public service facilities* are assessed and are acceptable.

11. In territory without municipal organization:

- a) New permanent town sites will not be permitted.
- b) *Development₁* will generally be restricted. Permanent residential

development₁ will not be permitted where opportunities for permanent residential *development₁* exist in nearby municipalities.

Development₁ will be permitted only if:

- i) it is directly related to a resource, and proximity to the resource is necessary; or
 - ii) it is appropriate to specific native, aboriginal or metis community needs; or
 - iii) it is within or adjacent to a built-up area in the territory without municipal organization; and
 - iv) the long-term suitability of the site for *individual on-site systems* has been demonstrated. *Development₁* will be permitted on *public communal services* only in the situation where communal services are required to address remediation of failed *individual on-site systems*.
12. Reasonable public access to *public land* and water bodies should be maintained or provided.
13. Policies and decisions regarding *development₂* and *infrastructure* should conserve *significant* landscapes, vistas, and ridge-lines.
14. Policies and decisions regarding *development₂* and *infrastructure* should conserve *significant cultural heritage landscapes* and *built heritage resources*.
15. *Development₂* and *infrastructure* may be permitted on sites containing *significant archaeological resources* and on sites with medium and high potential if the site is studied and the *archaeological resources* are removed, catalogued and analyzed prior to *development₂*, or construction. Where *significant archaeological resources* must be preserved on site to ensure their heritage integrity, only *development₂* and *infrastructure* which maintain the heritage integrity of the site will be permitted.
16. The continuous linear characteristics of *significant* transportation and infrastructure corridors and rights-of-way, including abandoned railway corridors, should be protected.
17. Land uses such as residences, day care centres, or educational, and health facilities, which may be sensitive to the effects of odour, noise, and other contaminants, should be appropriately designed, buffered and/or separated from major facilities such as airports, transportation corridors, sewage treatment facilities, waste sites, industries and aggregate activities to prevent *adverse effects* from these emissions and contaminants.

C Housing Policies

GOAL

To provide opportunities in each municipality for the creation of housing that is affordable, accessible, adequate and appropriate to the full range of present and expected households in the housing market area.

1. The opportunity for housing types to meet the present and expected needs of the full range of households in the *housing market area* will be provided.
2. a) Opportunities will be provided for no less than 30 percent of new dwelling units created through *development₄* and *intensification₂* to be *affordable housing*.
- b) Opportunities will be provided for, wherever feasible, no less than half of the new housing required through policy C2 a) to be affordable to the lowest 30th percent of the household income distribution for the *housing market area*. Full use will

be made of innovative *development₄* and *redevelopment*, and *small-scale intensification*, public lands, government programs and other available tools to implement this provision.

3. The opportunities referred to in policies C1 and 2 will be provided in each *community planning area*.

4. *Small-scale intensification* will be permitted in all areas permitting residential use, except where *infrastructure* is inadequate, or there are significant physical constraints. This is in addition to Planning Act provisions permitting certain houses to have two residential units.

5. The use of residential development standards that facilitate *affordable housing* and compact urban form is encouraged in *development₄* and *redevelopment*.

6. Where land owned by the provincial government is declared surplus and is suitable for housing, opportunities will be provided for the development of *affordable housing*. In the case of smaller sites where only one project can be accommodated, the opportunities will be for the development of *not-for-profit housing*. In the case of other sites, the opportunities will be for the development of housing serving a broader income range.

7. A sufficient supply of land for *development₄* and *intensification₂* will be maintained in accordance with policies under Goal B to allow for the housing types required to meet the needs of the full range of present and expected households in the *housing market area*. Specifically:

- municipalities will maintain at least a continuous ten-year supply of land designated for residential *development₄* or *redevelopment*; and
- where *development₄* is to occur, municipalities will maintain at least a continuous three-year supply of land for such *development₄* in draft approved/registered plans of subdivision.

8. Alternative approaches to implementing Goal C may be used by:

- townships, villages and towns with populations below 10,000, other than:
 - villages and towns bounded by a township with a population of 10,000 or more;
 - townships bounded by a town or city with a population of 10,000 or more; and
 - those within a regional municipality or the Census Metropolitan Areas of London and Windsor; and
- areas under the jurisdiction of planning boards, except in those portions of planning areas that are cities or towns with a population of 10,000 or more.

9. Upper-tier municipalities will allocate their projected housing needs among the lower-tier municipalities.

that produce value-added agricultural products from the farm operation.

- **agriculture-related uses:** those farm-related commercial and farm-related industrial uses that are directly related to the farm operation and are required in close proximity to farm operations.

Extensions of *settlement areas* affecting *prime agricultural areas* will be permitted only if the policies of Goal B are met.

2. Non-agricultural uses, including *public service facilities*, are not permitted within *prime agricultural areas* and are encouraged to locate in existing communities to support, where possible, community economic development.

New *infrastructure* may be permitted within *prime agricultural areas* only if it has been approved through an *environmental assessment process*.

3. Lot creation in *prime agricultural areas* is generally discouraged, and will be permitted only for:

- primary agricultural uses where the severed and retained lots are intended for primary agricultural uses and are of a size appropriate for the type of agricultural use(s) common in the area, and are sufficiently large to maintain flexibility for future changes in type or size of agricultural operation;
- existing agriculture-related uses;
- *residences surplus to farming operations*;
- *residential infilling*;
- one lot for a farm operation for a full time farmer of retirement age who is retiring from active working life, was farming on January 1, 1994 or an earlier date set in an existing official plan, and has owned and operated the farm operation for a substantial number of years;
- *infrastructure* where the facility cannot be accommodated through the use of easements or rights-of-way; and
- *legal or technical reasons*.

Lots for any of the residential uses listed above will be kept to the minimum size needed to accommodate the residence plus *individual on-site systems* and should be located in such a way as to avoid the most productive portion of the farm.

4. In *prime agricultural areas*, extraction of *mineral aggregates* on *prime agricultural lands* may be permitted as an interim use provided that agricultural rehabilitation of the site will be carried out whereby substantially the same areas and same average soil quality for agriculture are restored.

On *prime agricultural lands*, extraction may occur below the water table and complete agricultural rehabilitation is not required only if it is demonstrated that:

- a) there is a substantial quantity of *mineral aggregate* below the water table warranting extraction below the water table;
- b) other alternatives have been considered by the applicant and found unsuitable. Other alternatives include resources in areas of classes 4 to 7 agricultural lands, resources on lands committed to future urban uses, and resources on *prime agricultural lands* where rehabilitation to agriculture is possible; and
- c) in those areas remaining above the water table following extraction, agricultural rehabilitation will be maximized.

5. New *development₁* and land uses, and new or expanding livestock facilities will comply with the *minimum distance separation formulae*.

D Agricultural Land Policies

GOAL

To protect prime agricultural areas for long-term agricultural use.

1. *Prime agricultural areas* will be protected for *agricultural use*, being:

- **primary agricultural uses:** the growing of crops or raising of livestock and other animals for food or fur, including poultry and fish;
- **secondary agricultural uses:** uses secondary to the farm operation, such as home occupations, home industries, and uses

E Conservation Policies

GOAL

To encourage energy conservation, water conservation, and the reduction, re-use and recycling of waste.

1. Municipalities should be planned to provide opportunities for energy and water conservation through means such as siting, design, landscaping, *infrastructure* and building design.
2. Municipalities should be planned to promote the most efficient modes of transportation and to reduce the need for the private automobile by giving priority to energy-efficient low-polluting travel, such as walking, bicycling, and public transit.
3. The built environment and the energy resources embodied in the building materials and in the transport of those materials should be conserved, where feasible, through re-use, recycling and renovation.
4. Provision should be made for *waste management systems* to accommodate *development*₁ and complement reduction, re-use and recycling objectives.

F Mineral Aggregate, Mineral and Petroleum Resources Policies

GOAL 1

To ensure all parts of Ontario possessing mineral aggregates, an essential non-renewable resource to the overall development of any area, share a responsibility to identify and protect mineral aggregate resources and legally existing pits and quarries to ensure mineral aggregates are available at a reasonable cost and as close to markets as possible to meet future local, regional, and provincial needs.

- 1.1 Any planning jurisdiction, including municipalities and planning boards, shall identify and protect as much of its *mineral aggregate* as is practicable, in the context of other land use planning objectives, to supply local, regional and provincial needs.
- 1.2 *Legally existing pits and quarries* shall be identified and protected from incompatible land uses so that these operations are a permitted activity, with no uses or other activities permitted that would be incompatible with *mineral aggregate* operations.
- 1.3 In recognition of the continuing local, regional and provincial need for *mineral aggregates*, as much of the *mineral aggregate* resources as is realistically possible in the context of other planning objectives shall be identified and protected from land uses which are incompatible with possible future extraction.
- 1.4 Non-aggregate land uses or *development*_{1,3} may be permitted in areas of *mineral aggregate* resources which are protected in the official plan, where it can be shown that:
 - a) extraction would not be feasible; or
 - b) the proposed land use or *development*_{1,3} serves a greater long term interest of the general public than does aggregate extraction; or
 - c) the proposed land use or *development*_{1,3} would not significantly preclude or hinder future extraction.

1.5 Clear and reasonable policies shall be provided to permit the establishment or expansion of pits and quarries.

1.6 *Wayside pits and quarries* shall be permitted in all plan designations and all zoning categories without requiring an amendment to the plan or zoning by-law, except the plan may require a rezoning for a *wayside pit or quarry* in areas of existing development or particular environmental sensitivity which are designated in the plan.

1.7 After uses that are compatible with long term planning goals may be identified to facilitate rehabilitation*.

* In parts of Ontario not designated under the *Aggregate Resources Act*, it is encouraged that rehabilitation standards compatible to those under the *Aggregate Resources Act* be adopted for aggregate extraction operations on private land.

GOAL 2

To protect mineral and petroleum resource operations, deposits of minerals and petroleum resources, and areas of potential mineral and petroleum resources for resource use.

2.1 *Mineral and petroleum resource operations, deposits*, and areas of *potential mineral and petroleum resources* will be identified for resource use and protected from incompatible *development*₃.

2.2 In areas of *deposits* and areas of *potential mineral and petroleum resources, development*₃ that precludes or hinders future access to and use of these resources will be permitted only if:

- a) resource use is not feasible; and
- b) existing or proposed uses serve a greater long-term public interest than does resource use.

2.3 *Development*₃ on lands adjacent to *mineral and petroleum resource operations*, or adjacent to areas of *deposits* will be permitted only if:

- a) the *development*₃ would not preclude or hinder the continuation of the existing operations; and
- b) the *development*₃ would not preclude the development of the resource; and
- c) issues of potential public health and safety and environmental protection are addressed.

2.4 Rehabilitation of mineral and petroleum resource lands will be required after extraction and other related activities have ceased.

G Interpretation and Implementation

INTERPRETATION

This comprehensive set of policy statements is issued under Section 3 of the *Planning Act* by the Ministry of Municipal Affairs, in conjunction with other ministries.

Section 3 of the *Planning Act* requires that, in exercising any authority that affects planning matters, planning authorities "shall be consistent with" policies adopted under the Act.

These policies are to be read in conjunction with other policy statements issued under the *Planning Act*. These policies should also be read in their entirety, and all applicable policies applied to each situation. Nothing in these policies is intended to prevent planning authorities from going beyond the minimum standards established in any of these policies, unless doing so would conflict with any other policy statement.

These policy statements do not supersede or take priority over any other policy statement.

Implementation:

1. Policy statements will be implemented by municipalities and other planning jurisdictions through their decisions on official plans, subdivisions, consents, zoning by-laws, minor variances, and other planning matters.

2. Once the policy statements come into effect, planning authorities "shall be consistent with" the policies in making decisions on all new planning applications. However, where a complete application has been made to the approval authority before the effective date of the policy statements, it must reflect the policy environment in place at the time of application. Similarly, in the review of site plans and rezonings which implement an approved application, planning authorities will apply the same policies which were used to review the approved application.

3. The Ministry of Municipal Affairs, together with other ministries and in consultation with the public, may prepare guidelines to assist planning jurisdictions in implementing policy statements. Implementation guidelines are advisory and will provide information on the meaning of the policies and illustrate ways for policies to be implemented.

4. Ministries will provide available information to planning jurisdictions on matters of provincial significance outlined in policy statements, and may assist planning jurisdictions in mapping and developing their policies.

5. *Infrastructure* may be authorized under legislation other than or in addition to the *Planning Act*. Other authorizing legislation may include the *Environmental Assessment Act*, the *Ontario Energy Board Act*, and the *Ontario Water Resources Act*. An *environmental assessment process* may be applied to new *infrastructure* as part of this authorization process. Generally, such a process involves the consideration of alternatives to the undertaking, and location and alignment alternatives early in the planning process to avoid significant features and environmental impacts; and the incorporation of siting, construction methods and mitigation measures to minimize environmental impacts where avoidance of the feature is not possible.

In this context, the term "environment" is broadly defined and includes: air, water and land; plant and animal life; social economic and cultural conditions; buildings and structures; and emissions. As part of the environmental assessment planning process, it is the responsibility of the proponent to consider all applicable policies in evaluating effects on the environment. The applicable policies of Goals A to F would therefore be considered as part of the authorization process for the undertaking.

6.1 Except in the circumstances identified in 6.3 below, an *environmental impact study (EIS)* will be required for development proposals in the following areas:

- lands adjacent to *significant* ravine, valley, river, and stream *corridors*, to *significant* portions of the habitat of *endangered species* and *threatened species*; and to the features covered by policy A1.2b(1); and
- lands in and adjacent to *significant* portions of the habitat of *vulnerable species*, *significant* natural *corridors*, *significant* woodlands south and east of the Canadian Shield, *areas of natural and scientific interest*, *shorelines of lakes, rivers and streams*, and *significant* wildlife *habitat*, in accordance with policy A1.2b(2).

6.2 An *EIS* shall include:

- a) a description of the existing natural environment that will be affected or that might reasonably be expected to be affected, either directly or indirectly;
- b) the environmental effects that might reasonably be expected to occur;
- c) alternative methods and measures for mitigation of potential environmental effects of the proposed *development*_{1,2}; and
- d) a monitoring plan to measure the potential effects on the environment.

6.3 An *environmental impact study* will provide a basis for assessing impacts. Other environmental planning processes may incorporate the elements of an *EIS* and serve the same purpose. For example, where detailed development criteria have been applied to a site through a mechanism such as a comprehensive planning process, a comprehensive *EIS*, or on the basis of a watershed or subwatershed plan, a site-specific *EIS* may not be required.

Similarly, where *infrastructure* which is subject to the *Planning Act* has been authorized under an *environmental assessment process*, and has undergone a systematic process of examining impacts on the environment, an *EIS* will not be required. Where *infrastructure* which is subject to the *Planning Act* is not authorized under an *environmental assessment process*, an *EIS* will be required.

 - Hurricane Hazel storm (1954);
 - Timmins Storm (1961);
- b) *one hundred year flood*; and
- c) an *observed flood event*, subject to the approval of the Minister of Natural Resources.

The *one hundred year flood* is the minimum acceptable regulatory flood standard. For those watersheds with a regulatory flood standard greater than the minimum acceptable (see Figure F1), the Minister of Natural Resources may change the standard, in accordance with established procedures, provided that a significant proportion of municipalities and/or planning boards within the watershed support the change in consultation with the local Conservation Authority or MNR, where no Conserva-

tion Authority exists. The lowering of the existing regulatory *flood* standard will not be considered where the past history of *flooding* reveals that a higher level is more appropriate.

Where *flooding* is experienced in excess of the existing regulatory flood standard, the Minister of Natural Resources may require the regulatory flood standard to be modified to reflect the *observed flood event*.

Regulatory flood standard: (for the Great Lakes and their connecting channels and the St. Lawrence River)

- facilities which by their nature must locate near water or traverse watercourses;
- ancillary facilities of an adjacent land use which are of a passive, non-structural nature and do not adversely affect the ability of the *flood plain* to pass *flood* waters.

Rural and recreational characteristics:

means elements of a municipality's physical, environmental, economic, social, or cultural fabric through which its identity or uniqueness has evolved and is defined. Examples include historic settlement patterns, natural or cultural resources, waterways, and distinctive landscapes or vistas.

Rural areas:

means lands in the rural area which are not *prime agricultural areas*.

Settlement areas:

means *built-up areas* and that surrounding land which has been designated for development over the long term planning horizon. In some cases, the *settlement area* may be no larger than the *built-up area*.

Sewage and water systems

Full municipal sewage and water services:

means piped sewage and water services that are connected to a

centralized water and waste water treatment facility and provided by a municipality or other public authority.

Public communal services:

means sewage works and sewage systems, and water works that provide for the distribution, collection or treatment of sewage or water but which:

- are not connected to *full municipal sewage and water services*;
- are for the common use of more than five residential units/lots; and
- are owned, operated, and managed by either:
 - the municipality; or
 - another public body; or
 - where ownership by a municipality or another public body cannot be achieved, by a condominium corporation or single owner through a responsibility agreement with the municipality or public body, which requires municipal/public body assumption of the communal services in the event of default.

Individual on-site systems:

means individual autonomous water supply and sewage disposal systems, that are owned, operated and managed by the owner of the property upon which the system is located and which do not serve more than five residential units/lots.

Partial services:

means connection to one public communal or full municipal service where the other connection will be to an *individual on-site system*.

Shorelines of lakes, rivers and streams:

means, in relation to naturally features and functions, the lands in immediate contact with, or in seasonally inundated areas adjacent to waterbodies such as lakes, rivers or streams. These may be naturally vegetated or potentially revegetated.

Significant:

means:

- in regard to natural features and functions, ecologically important to the natural environment in terms of amount, content, representation, or effect, thereby contributing to the quality and integrity of an identifiable ecological region or natural heritage system. Significance will be determined based on criteria and guidelines established by the province or on comparable municipal evaluations.
- in regard to matters other than natural features and functions, important in terms of amount, content, representation, or effect.

Significant archaeological resources:

means a resource of known archaeological significance, as well as an area with medium or high potential.

Small-scale intensification:

means residential intensification which adds dwelling units without *redevelopment* and includes infill; rooming, boarding and lodging houses; and apartments in houses.

South and east of the Canadian Shield:

as it applies to woodlands, means lands lying south and east of the southern boundary of the Precambrian Shield, excluding Manitoulin Island.

Special policy area:

means an area within a community that has historically existed in the *flood plain* and where strict adherence to certain province-wide policies concerning new development would result in social and economic hardships for the community. As a result, site specific policies are formulated and applied within the defined limits of the special policy area.

Specialty crop land:

means lands where specialty crops such as tender fruits (peaches, cherries, plums), grapes, other fruit crops, vegetable crops, greenhouse crops, and crops from agriculturally developed organic soil lands are predominantly grown, usually resulting from:

- soils that have suitability to produce specialty crops, or lands that are subject to special climatic conditions, or a combination of both; and/or
- a combination of farmers skilled in the production of specialty crops, and a capital investment in related facilities and services to produce, store, or process specialty crops.

Stable slope:

means the angle a slope would achieve when toe erosion and/or human activities are absent.

Storm centred event:

means a major storm of record used for regulatory purposes. The rainfall actually experienced during a major storm event can be transposed over another *watershed* and when combined with the local conditions, *flood plain* limits can be established. This centring concept is considered acceptable where the evidence suggests that the storm event could have potentially occurred over other *watersheds* in the general area.

In Ontario, two storm centred events are used for regulatory purposes:

- the Hurricane Hazel storm (1954); and
- the Timmins storm (1961).

Threatened species:

means any indigenous species of fauna or flora that, on the basis of the best available scientific evidence, is indicated to be experiencing a definite non-cyclical decline throughout all or a major portion of its Ontario range, and that is likely to become an *endangered species* if the factors responsible for the decline continue unabated.

Transportation system:

means public corridors, transit systems, roads, pathways, and other facilities for the movement of people or goods. Modes of transportation in these systems may include automobile, bus, train, truck, aircraft, bicycle, wheelchair or foot.

Two zone concept:

means the approach whereby certain areas of the *flood plain* are considered to be less hazardous than others such that *development₃* potentially could safely occur. The *flood fringe* defines that portion of the *flood plain* where *development₃* may be permitted, subject to appropriate *floodproofing*. The *floodway* defines that portion of the *flood plain* wherein *development₃* is prohibited or *restricted*.

Vulnerable species:

means any indigenous species of fauna or flora that is particularly at risk because of low or declining numbers, occurrence at the fringe of its range or in restricted areas, or for some other reason, but is not a *threatened species*.

Waste management system:

means sites and facilities to accommodate solid waste from one or more municipalities, and includes landfill sites, recycling facilities, transfer stations, processing sites and hazardous waste depots.

Watershed:

means all lands drained by a river or stream and its tributaries (*Conservation Authorities Act*, R.S.O. 1980).

Wave uprush:

means the rush of water up onto a beach, bluff or structure following the breaking of a wave; the limit of wave uprush is the point of farthest landward rush of water onto the shoreline.

Wayside pit or wayside quarry:

means a temporary pit or quarry opened and used by or for a public road authority solely for the purpose of a particular project or contract of road construction and not located on the road right-of-way.

Wetland area:

means a single contiguous wetland which may be composed of one or more *wetland types* (see Figure W2).

Wetland complex:

means two or more individual *wetland areas* along with their *adjacent lands* that are related in a functional manner and are grouped within a common wetland boundary (see Figure W2). The whole complex is evaluated and classified, not its individual *wetland area* components.

Wetland functions:

mean the biological, physical, and socio-economic interactions that occur in an environment because of the properties of the *wetlands* that are present, including, but not limited to:

- ground water recharge and discharge;
- flood damage reduction;
- shoreline stabilization;
- sediment trapping;
- nutrient retention and removal;
- food chain support;
- habitat for fish and wildlife; and
- attendant social and economic benefits.

Wetland types:

means individual wetland ecosystems that have specific characteristics, and are commonly called marshes, swamps, bogs and fens.

Wetlands:

means lands that are seasonally or permanently covered by shallow water, as well as lands where the water table is close to or at the surface. In either case the presence of abundant water has caused the formation of *hydric soils* and has favoured the dominance of either *hydrophytic* or water tolerant plants. The four major types of *wetlands* are swamps, marshes, bogs and fens.

Lands being used for agricultural purposes, that are periodically "soaked" or "wet", are not considered to be *wetlands* in this definition. Such lands, whether or not they were *wetlands* at one time are considered to have been converted to alternate uses.

Wildlife habitat:

means areas of the natural environment where plants, animals, and other organisms, excluding *fish*, survive in self-sustaining populations, and from which they derive services such as cover, protection, or food.

Woodlands:

are complex ecosystems of different tree species, shrubs, ground vegetation and soil complexes that provide habitat for many plants and animals. Woodlands is a general term which collectively refers to areas occupied by trees, treed areas, woodlots and forested areas.

HYDRO-ELECTRICITY CHARGES

1. In this Regulation,

“holder of a water power lease” means a person subject to a water power lease, but does not include Ontario Hydro;

“net energy generated” means, in respect of a period of time, the total amount of electric energy, expressed in megawatt-hours, produced by a generating station during the period, less the energy in megawatt-hours consumed for station use or service in the same period;

“water power lease” means an agreement, lease, licence or other writing under subsection 42 (2) of the Act.

2. (1) The holder of a water power lease shall pay to the Crown a hydro-electricity charge for each calendar year covered in whole or in part by the term of the lease.

(2) The amount of the hydro-electricity charge for a calendar year shall be determined by multiplying the energy rate for the year (determined in accordance with section 3) by the net energy generated during the year from water flowing on the land that is subject to the water power lease.

(3) Despite subsection (1), no hydro-electricity charge is payable in respect of a water power lease if the generating station has been in service during fewer than 10 calendar years.

(4) This section applies in respect of the calendar year beginning on January 1, 1994 and in respect of every calendar year thereafter.

3. (1) For the calendar year beginning on January 1, 1994, the energy rate is \$3.1000.

(2) For the calendar year beginning on January 1, 1995 and for every calendar year thereafter, the energy rate shall be determined to four decimal places in accordance with the following formula:

$$\text{Energy rate} = \$3.5550 \times \frac{\text{CPI}}{172.7}$$

where CPI = the average for the year of the 12 monthly Consumer Price Indexes for Canada (All Items) published by Statistics Canada under the authority of the *Statistics Act* (Canada).

(3) For the calendar year beginning on January 1, 1995 and for every calendar year thereafter, the Minister shall, within 30 days after the end of the year, provide to every holder of a water power lease a statement setting out the energy rate applicable to the year.

4. (1) The holder of a water power lease shall, on or before January 31 in each year, submit to the Minister a statement signed on behalf of the holder showing the net energy generated during the preceding calendar year from water flowing on the land that is subject to the lease.

(2) If the holder of a water power lease does not comply with subsection (1), the hydro-electricity charge for the preceding calendar year shall be increased by 5 per cent.

5. (1) The hydro-electricity charge for the calendar year beginning on January 1, 1994 shall be paid on or before February 28, 1995.

(2) For the calendar year beginning on January 1, 1995 and every calendar year thereafter, the hydro-electricity charge shall be paid in the following manner:

1. On or before the last day of February of the year, the holder of the water power lease shall make an interim payment equal to 50 per cent of the amount of the hydro-electricity charge, as estimated by the Minister.
2. On or before July 1 of the year, the holder of the water power lease shall make a further interim payment equal to 25 per cent of the amount of the hydro-electricity charge, as estimated by the Minister.
3. On or before the last day of February in the next calendar year, the holder of the water power lease shall pay the balance of the hydro-electricity charge, based on the final amount of the charge determined under subsection 2 (2).
4. If the amount paid under paragraphs 1 and 2 exceeds the final amount of the hydro-electricity charge, the excess shall be applied to the amount of the hydro-electricity charge payable in respect of the next calendar year or, if no charge is payable in respect of the next calendar year, the excess shall be refunded.

6. (1) If the holder of a water power lease fails to pay any amount owing under this Regulation by the day it is due, interest on the amount shall accrue from the due date at the bank rate in effect at the end of that day, plus 6 per cent.

(2) In this section, “bank rate” means the bank rate established by the Bank of Canada as the minimum rate at which the Bank of Canada makes short term advances to banks listed in Schedule I to the *Bank Act* (Canada).
